

CHEM-STIKTM

NONIONIC SPREADER-STICKER

PRINCIPAL FUNCTIONING AGENTS

Emulsifiable Polyethylene & Alkyl Phenoxy Polyethoxy Ethanol.....	27.5%
Constituents Ineffective as Spray Adjuvant.....	72.5%
TOTAL.....	100.0%

All ingredients are approved for use under CFR 40, 180. 1001 (c).

CAUTION

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

Before using this product, read the entire label, including the conditions of sale.

May cause irritation to skin and eyes. Ingestion of large amounts may cause mucosal irritation, dizziness, nausea, and possible vomiting.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Give a large amount of water to drink. Induce vomiting. Seek medical attention immediately.

If Inhaled: Remove to fresh air.

If in Eyes: Flush with water for 15 minutes. Seek medical attention immediately.

If on Skin: Remove contaminated clothing. Wash skin contact area with plenty of soap and water.

GENERAL INFORMATION

CHEM-STIK is an easy to clean out, nonionic spreader-sticker formulated to maximize leaf surface coverage of spray solutions, while providing washoff protection from untimely rainfall.

When used as directed, CHEM-STIK will increase wetting, adhesion, and endurance of pesticide sprays. This is especially beneficial during windy and rainy periods, as well as under other adverse weather conditions.

DIRECTIONS FOR USE

FOR USE WITH PESTICIDES REGISTERED FOR AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, NONCROPLAND, RIGHTS-OF-WAY, AND OTHER APPROPRIATE USES.

The addition of adjuvants to some pesticides and/or fertilizers and their tank mixes may cause phytotoxicity to the foliage and/or fruit of desirable crops. Before using CHEM-STIK, the applicator or crops advisor must have experience with the pesticide combination, including CHEM-STIK, or must have conducted a phytotoxicity test.

Always follow herbicide label recommendations regarding adjuvants, in particular, spreader-stickers. In the absence of specific recommendations, follow the guidelines set forth below.

USE RATES

As a general guide, use 4-8 ounces of CHEM-STIK per 100 gallons of spray solution. Higher rates may be used when conditions require additional sticking properties. Rates up to 16 ounces per 100 gallons will optimize the sticking of pesticides.

MIXING

Always mix this product in accordance with the instructions found on the pesticide label concerning adjuvants. In the absence of specific mixing instructions, fill the spray tank 1/2 to 3/4 full of desired water volume. While the water is agitating, add tank mix ingredients in the following order:

1. If foaming is anticipated, use an antifoam/defoamer such as GUNDOWNTM or KNOCKDOWNTM.
2. Ammonium sulfate, fertilizers and micronutrients
3. Water-soluble packets, dry flowables, and dispersible granule pesticides
4. Flowable pesticides
5. Water-soluble pesticides
6. Emulsifiable concentrate pesticides
Continue agitation and finish filling spray tank to desired level
7. Add CHEM-STIK to the spray solution and continue agitation.

STORAGE AND DISPOSAL

Protect product from freezing. If product freezes, warm to room temperature before use. Store in original container only and do not reuse empty container. Rinse container thoroughly and dispose of the container in accordance with local, state and federal regulations.

CONDITIONS OF SALE

Note: Read the information contained herein before buying or using this product. If the stated terms are not acceptable, return the product at once, unopened. It is critical that this product be used and mixed only as specified on this label. Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, with respect to the results from the use of this material. Buyer and user assume all risks of use and/or handling. Precision Laboratories, Inc. warrants that this material is reasonably fit for use as specified on this label. No agent or representative is authorized to make any other representations concerning this material. Unforeseen factors beyond Precision's control prevent elimination of risks in connection with the use of its chemicals. Such risks include, but are not limited to, damage to plants and/or crops to which the material is applied, or lack of complete control and damage caused by drift to other plants or crops. Such risks may occur even though the product is reasonably fit for use as stated herein and even though label directions are followed. Follow directions carefully. Timing, mixture, method of application, weather and other conditions are influencing factors in the use of this product and are beyond the control of the seller. Except to the extent prohibited by applicable law, the exclusive remedy of the user or buyer and the limit of liability of the company or any other seller for any and all losses, personal injuries or damages resulting from the use of this product, shall be the purchase price paid by the user or buyer for the quantity of product involved.
